

## SUMMARY

Self-taught **MERN stack developer** proficient in **MongoDB, Express.js, React.js, and Node.js, TypeScript, Next.js**. Builds dynamic web apps and efficient **RESTful APIs** and **graphql**. Committed to continuous learning and Have an excel at multitasking and time management while remaining dedicated to writing clean, maintainable code and finding joy in solving complex problems.

## PROJECTS

### RENT A RIDE

[gitHub.com](#) [live link](#)

Rental is a **MERNstack** web application aims to provide a user-friendly experience, with a central focus on the rental process. This web application allows users to effortlessly rent bikes for specific time durations, ensuring a seamless and intuitive experience for users.

#### Features

- Developed a responsive bike rental website using **Node.js** and **React.js**.
- Implemented real-time chat functionality using **Socket.io**, enhancing user communication and engagement.
- Utilized **JWT** for secure user authentication and email verification, enhancing account security and **firebase**
- Integrated **Stripe** for seamless and secure payment processing, ensuring a smooth transaction experience.
- Implemented **Redux** for state management, enhancing application performance and scalability.
- Leveraged **Axios** and **Axios interceptors** for efficient HTTP requests, improving data retrieval and manipulation.
- Followed the **MVC (Model-View-Controller)** architecture for a modular and organized codebase.
- Implemented user-friendly interfaces for both users and partners, enhancing accessibility and usability.

### E-commerce

[gitHub.com](#) [live link](#)

Designed and developed a dynamic and feature-rich e-commerce web application for a complete furniture store, delivering a seamless online shopping experience. This comprehensive platform boasts essential functionalities, The result is an intuitive and user-friendly interface that enhances the overall shopping journey.

#### Features

- Utilizing **EJS** for the frontend, **Node.js**, and **Express.js** for the backend. The application is built using the **MVC architecture**. Conduct code reviews and provide feedback to improve code quality
- **MongoDB** is utilized as the database for the application, alongside **Node-mailer** for email verification and **Razorpay** for payment processing. Troubleshoot and resolve software defects and issues
- Integrated a comprehensive **coupon system** for both fixed-amount and percentage-based coupons, as well as a **wallet** for managing payments.
- Admin functionality includes **Banner, User, Product, Order, Category, Stock management**. **Furthermore**, the integration of robust sales functionalities and chart report.

## MINI PROJECTS

### Weather App

 [gitHub.com](#)

[live link](#)

- Frontend Development with **React.js**
- Integrated the open **Weather API** to fetch and display real-time weather data, providing users with up-to-date information.
- ensuring a responsive and user-friendly interface.

### Fruit List

 [gitHub.com](#)

[live link](#)

- Frontend Development with **React.js** and **next.js**, implemented **typeScript**
- Integrated the open **fruit API** to fetch and display fruit data, providing users with information.
- ensuring a responsive and user-friendly interface.

### Books Store

 [gitHub.com](#)

[live link](#)

- Frontend Development with **React.js** and **next.js** also implemented **typeScript**
- integrated the **graphql** and **node.js** and **mongoDB** managing the book and authors
- ensuring a responsive and user-friendly interface.

### Netflix

 [gitHub.com](#)

- Created Netflix Clone Application
- Utilized TMDB API Integration
- integrated the TMDB API to provide real-time content details.

### USER MANAGEMENT SYSTEM

 [gitHub.com](#)

- Designed a user management system using **React.js**, **NgRx** and **JWT (JSON Web Token)**. It includes features such as user login, registration and admin panel
- ensuring a responsive and user-friendly interface.

## SKILLS

- **Frontend Development** - **REACT.js**, **Tailwind CSS**, **Bootstrap**, **EJS**, **React-Redux**, **Redux-Toolkit**, **Type Script**, **NEXT.js**
- **Backend Development** - **Node.js**, **Mongoose**, **REST API**, **JavaScript**, **Express.js**, **TypeScript**, **MVC Architecture**, **graphql**
- **Database and Storage** - **MongoDB**, **Firestore**, **postgres SQL**
- **Integrations** - **Stripe**, **Razorpay**, **Nodemailer**, **Multer**, **Socket.IO**, **Twilio**, **Cloudinary**, **Firebase Authentication**, **JWT(json web token)**
- **Deployment** - **NGINX**, **AWS EC2**, **Route 53 (R53)**, **GitHub Pages**, **vercel**, **Render**
- **Design** - **Figma**, **Adobe Photoshop**

## EDUCATION

### **MERN Stack Development**

broTOTYPE

**2022 - Present**

Calicut, Kerala

### **Diploma in Computer Software**

Government Polytechnic College

**2019 - 2022**

wayanad, Kerala
